

# ALUMINUM BALCONY SYSTEM BALCONY SLIDING DOORS

## BOHSLIDE 52

**BOHSLIDE 52** is a very special product line dedicated for cruise liners and passenger vessels. Aluminum framed sliding doors are designed with using years of experience and best quality materials. It's a complete door module with sliding door leaf with flexible installation method without drilling or welding thanks to clamp-on design.

## ADVANTAGES OF BOHSLIDE 52

- Active leaf and glazing beads on the outside in order to get a better tightness.
- Optionally thermal insulated profiles for better thermal parameters.
- Optionally thermal insulated tempered glass acc. to DIN 614.
- Door can be hold in any position by turning the handle; Rotating handle does not collide with the construction at the maximum opening to hold the leaf in the open position.
- Non visible active leaf hooks – sleek design, no visually disturbing elements.
- Glazing beads from outside - improving tightness and stiffness.
- Door can be equipped with „Child lock” knob; Child Lock - placed at a safe height additional lock, which blocks the handle and also is an extra burglarproof device.
- Clamp-on design – easy and quick installation proces - no welding, no drilling.
- Magnetic sensor as an option – triggering air condition to avoid unnecessary waste of energy.
- Clean opening – no protruding elements.
- Flat doorstep design.
- Watertight/ weathertight construction.
- All profiles preanodised and powder painted for marine environment (RAL/NCS).
- Integration with LED lighth or speaker possible.
- Integration with optional sidelights.
